

1. Faktorial Iteratif

```
1 #include <iostream>
2 using namespace std;
3
4 int main() {
5     int n;
6     long long faktorial = 1;
7
8     cout << "Masukkan n: ";
9     cin >> n;
10
11     for (int i = 1; i <= n; i++) {
12         faktorial *= i;
13     }
14
15     cout << n << "! = " << faktorial << endl;
16
17     return 0;
18 }
```

2. Faktorial Rekursif

```
1 #include <iostream>
2 using namespace std;
3
4 long long faktorial(int n) {
5     if (n == 0 || n == 1)
6         return 1;
7     else
8         return n * faktorial(n - 1);
9 }
10
11 int main() {
12     int n;
13
14     cout << "Masukkan n: ";
15     cin >> n;
16
17     cout << "Faktorial dari " << n << " adalah " << faktorial(n)
18
19     return 0;
20 }
```

3. Deret Faktorial

```
1 #include <iostream>
2 using namespace std;
3
4 long long faktorial(int n) {
5     if (n == 0 || n == 1)
6         return 1;
7     else
8         return n * faktorial(n - 1);
9 }
10
11 int main() {
12     int n;
13
14     cout << "Masukkan n: ";
15     cin >> n;
16
17     for (int i = 1; i <= n; i++) {
18         cout << i << "! = " << faktorial(i) << endl;
19     }
20
21     return 0;
22 }
```
